Following HAP purification, this DNA was used as tracer in a subtractive hybridization reaction. The driver was PCR-amplified cDNAs from a pool of 5,000 clones made from the same library (cloneids 1057416-1061255, and 1144984-1145351).

NCL_CGAP_P16 is a subtracted cDNA library constructed
according to Bonaldo, Lennon and Soares, Genome Research,
6:791-806, 1996. First strand cDNA synthesis was primed
with an oligo-dT primer containing a Not I site. Double
stranded cDNA was ligated to an EcoR I adaptor, digested
with Not I, and cloned directionally into pT773-Pac
vector. The oligonucleotide used to prime the synthesis of

useful for of TANGO and INTERCEPT nucleic acids, proteins, and antibodies, useful fo screening assays and diagnostic assays and for the treatment of neurological diseases such as Alzheimer's, Parkinson's and Huntington' disease

2; 359pp; English. Claim 1; Fig

The present invention relates to TANGO or INVERCEPT proteins and coding sequences (see AAF45121-F45136 and AAF45138-F45139 and AAB66031-B66057, AAB66064-B66093 and AAB66085). The TANGO/INTERCEPT proteins and coding sequences are useful for the treatment of neurological disorders such as central nervous system (CNS) disorders, CNS-related disorders, focal brain disorders, global-diffuse cerebral disorders and other neurological and cerebrovascular disorders. The CNS disorders include Alzheimer's disease, senile dementia, Huntington's disease, amyotrophic lateral solerosis, Parkinson's, Gilles de la Tourette's syndrome, autonomic function disorders such as hypertension and sleep disorders, neuropsychiatric disorders, psychoactive substance use disorders, anxiety, and bipolar affective disorder.

The present invention relates to TANGO or INTERCEPT proteins and coding sequences (see AAF45121-F45136 and AAF45138-F45139 and AAB66031-B66057, AAB660646-B66083 and AAB66085). The TANGO/INTERCEPT proteins and coding sequences are useful for the treatment of neurological disorders such as central nervous system (CNS) disorders, CNS-related disorders, focal brain disorders, global-diffuse cerebral disorders and other neurological and cerebrovascular disorders. The CNS disorders include Alzheimer's disease, senile dementia, Huntington's disease, amyotrophic lateral sclerosis, partinson's, Gilles de la Tourette's syndrome, neuroposychiatric disorders such as hypertension and sleep disorders, and bipolar affective disorder.
                                                                                                                                                                                    assays and diagnostic assays and for the treatment of cal diseases such as Alzheimer's, Parkinson's and Huntington's

POLY8. POLYX nucleic acids, polypeptides and antibodies to POLYX can be used for treating or preventing a POLYX associated disorder in a subject, preferably a human. These can be used in the manufacture of a medicament for treating a syndrome associated with a human disease selected from a POLYX-associated disorder, where the therapeutic is a POLYX polypeptide, a POLYX nucleotide or a POLYX antibody. They may also be used to screen for a modulator of activity, or latency, or predisposition to a POLYX associated disorder, e.g. cancer.
                                 POLYX

ပဲ Хu Ren F; Chen R, OA, Ď, Zhao Wang Zhang J, Ma Y, W Asundi V, Zu Zhou P, Asunaı v Wehrman T, Wang Liu C, Yang Y, Tang YT, L Xue AJ, Ya Drmanac R; 

2001-589862/66 WPI; 2001-589862, P-PSDB; AAU27709 olypeptides and nucleic acids obtained from cDNA libraries d from various human tissues, for diagnosis, treatment of neurological, inflammatory disorders and for use in arrays Novel polypeptides and prepared from various hearcer, neurological, i detection

Claim 1; SEQ ID No 34; 153pp; English.

contig polynucleotides encoding polypeptides of the inventions and and protein sequences are useful for the treatment, diagnosis and and protein sequences are useful for the treatment, diagnosis and prevention of various types of disorder in a mammalian subject such as a chuman, dog, monkey, mouse, hamster or rat. The disorders include cancers such as leukamia, lymphoma and neuroblastcoma, autoimmune disorders such as multiple sclerosis, connective tissue disease, rheumatoid arthritis, disobtes mellitus, allergic thinitis, asthma and eczema, nervous system of disorders such as Parkinson's disease, Alzheimer's disease, Huntington's chorea, amyotrophic lateral sclerosis, spinal muscular atrophy and disease, ischaemia reperfusion injury, shock, sepsis and inflammatory bowel disease. The sequences exhibit activity relating to angiogenesis, cell proliferation, cell differentiation, stem cell growth factor.

Coll proliferation, cell differentiation, stem cell growth factor, activin or inhibin. Therefore, they can be used to manipulate stem cells in culture to give rise to neuroepithelial cells that can be used to agment or replace cells damaged by illness, accidental damage or genetic disorders. The sequences may also be used for regeneration of bone. cartilage, tendons and ligaments and in tissue répair and burn healing. Note: Some sequences for this patent did not form part of the printed specification, but were obtained in electronic format directly from WIPO at ftp.wipo.int/pub/published\_pct\_sequences. Sequences AAS44576-AAS44919 represent full-length polynucleotides and

The invention relates to human nucleic acids (AAI57798-AAI61369) and the encoded polypeptides (AAM38642-AAM42213) with nootropic, immunosuppressant and cytostatic activity. The polynucleotides are useful in gene therapy. A composition containing a polypeptide or polynucleotide of the invention may be used to treat diseases of the peripheral nervous system, such as peripheral nervous injuries, peripheral nervous localised neuropathies and central nervous system diseases, such as Alzheimer's, Parkinson's disease, Huntington's disease, amyotrophic lateral socierosis, and Shybrager Syndrome. Other uses include the utilisation of the activities such as: Immune system suppression, Activin/inhibin activity, chemotactic/chemokinetic activity, haemostatic
